

WESTMONT PTE LTD

Introduction

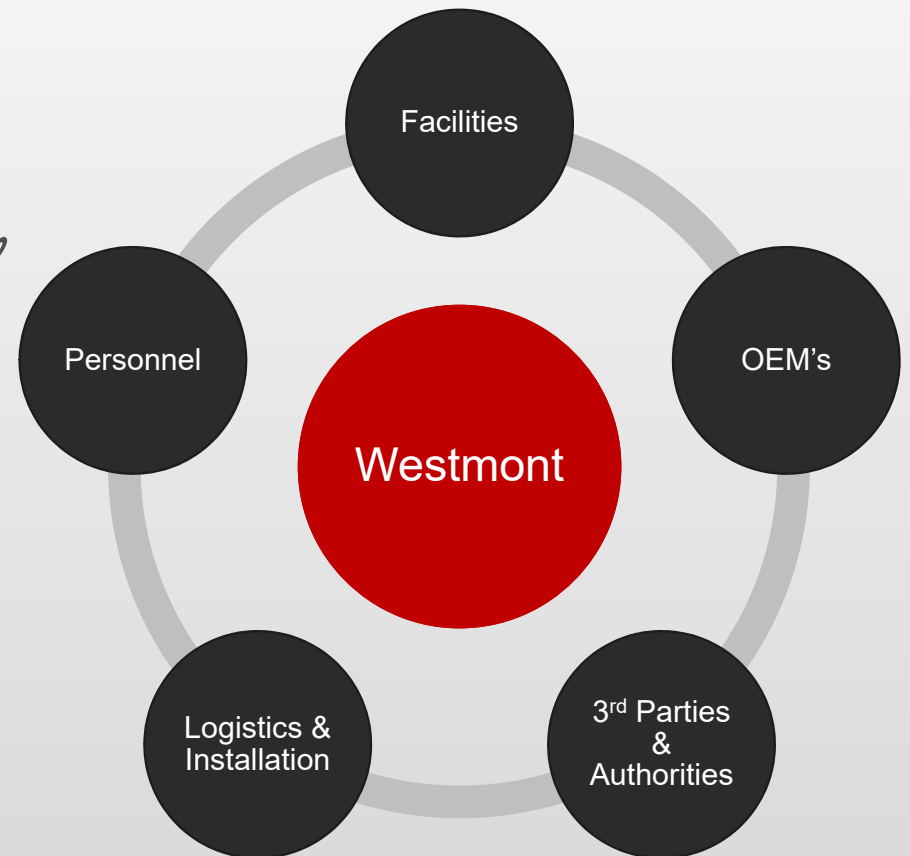

Our purpose

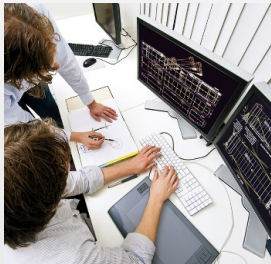

Westmont, your partner from inception to final delivery, we are there with you providing:

Expertise and Adaptability

Our expertise

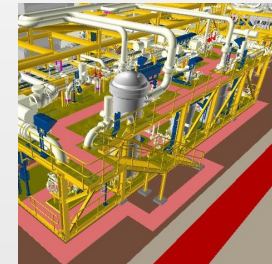

Engineering

Drilling Technologies

Equipment

Process Systems

Refurbishment

**Maintenance &
Modifications**

Onshore Assets

Project Management

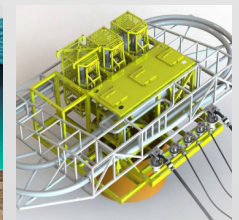

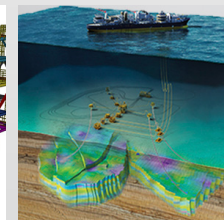

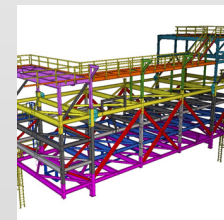

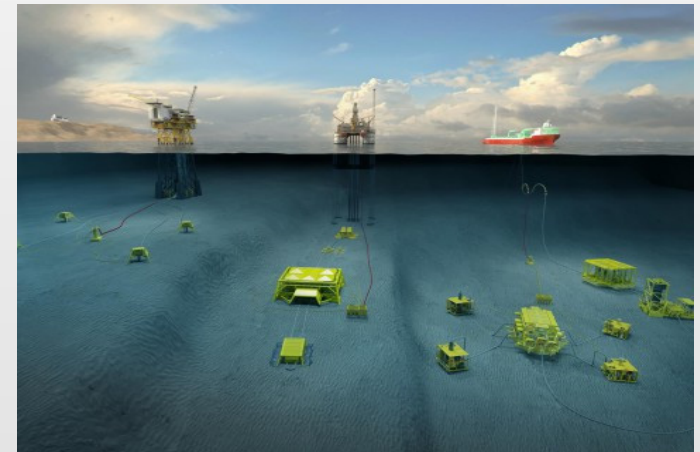

Engineering

Westmont provides independent and integrated engineering services from conceptual definition, design and construction, through to operation. Understanding how things work, how they are manufactured and how they are installed, are critical factors to ensuring that the first phase of any project is done properly.

Our expertise includes:

- Detailed design
- Front end engineering
- Piping and structural design
- Process engineering
- Product development
- Offshore and onshore process modules
- Subsea infrastructure design
- 3D and Tekla modelling
- Finite element analysis

Drilling technologies

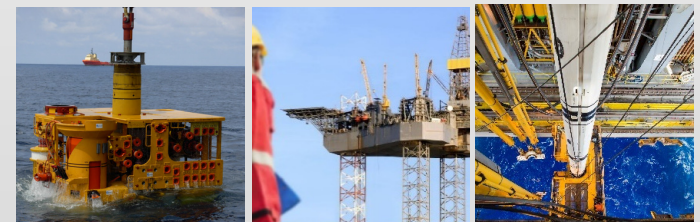

Westmont brings solutions to all aspects of both onshore and offshore drilling. We support the development of drilling systems and technologies. We manufacture the full drilling portfolio under OEM license and support the processes of engineering, specialist manufacturing, delivery, installation and commissioning.

We also provide spare parts for quick turn-around of new build and refurbishment products. We pride ourselves on brand integrity and do not support brand dilution.

We support and deliver:

- Subsea systems
- Drilling equipment
- Mooring and loading systems
- Oil field services
- Marine assets
- Well intervention

Equipment

Westmont provides manufacturing and fabrication services for onshore and offshore applications. From smaller fabricated items, to large EPC projects, we provide the strength in our delivery capabilities to meet the stringent requirements of any customer.

Our focus remains on providing high calibre services and original manufactured products, thereby integrating our supply chain and partnerships to ensure the right equipment is delivered with the highest quality and always on time.

We can provide:

- Manifolds and structures
- Connections and tie-in systems
- X-mas trees
- Well heads
- Modules
- ROV tools
- Drilling equipment

Process systems

Westmont provides technical expertise in design and delivery of equipment and plants. From conceptualisation, detailed design, placement and routing of piping, structures and equipment, to the facilitation of construction. We don't just design, we build. The main benefit to our customer is to have optimisation during engineering to ensure installation and operation as intended.

By incorporating constructability and safe operational performance into the design phase, the time needed to construct a plant reduces, so too the cost. We bring collaboration to engineering, technology, construction and operation.

We design and construct flare gas systems, enabling recovery and reinjection and operate both onshore and offshore.

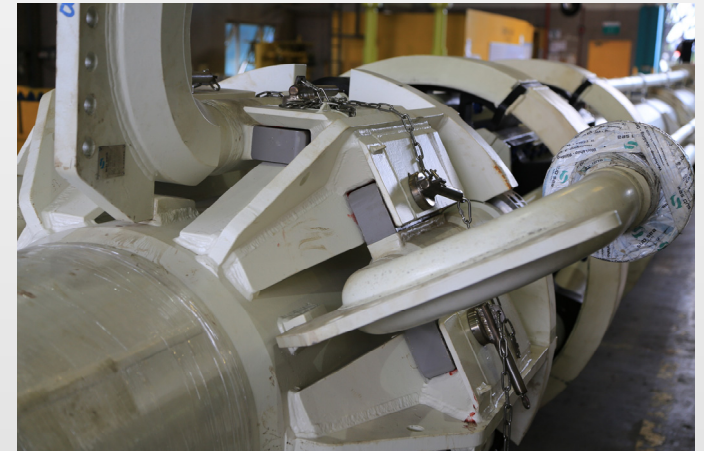

Refurbishment

Westmont provides specialist refurbishment services for all equipment, in particular for capital drilling. We provide a go anywhere adaptability that ensures the lowest possible cost with the maximum possible efficiency. We come to you, wherever you are working. We also provide on board inspection with improved measuring techniques and processes. We value brand protection and ensure the best service is supported and delivered.

Our refurbishment capabilities include recertifying:

- Drilling risers
- Telescopic joints
- Spiders
- Riser tension rings
- Termination adaptors
- Blow out preventers
- Manifolds
- Connectors and connection systems
- Test tools
- BOP control systems
- Managed pressure drilling
- Diversers

Maintenance & modifications

Westmont provides maintenance, modifications and improvements to facilities and assets.

We offer integrated solutions and deliver critical servicing and upgrades with maximum efficiency.

Our teams are highly skilled and schedule driven individuals and specialise in:

- Plant shut downs
- Equipment change out
- Plant expansion
- Piping and structural modifications
- Upgrades
- Electrical and instrumentation
- Painting and insulation

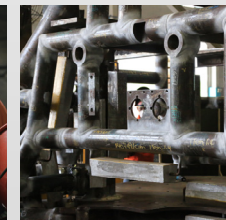

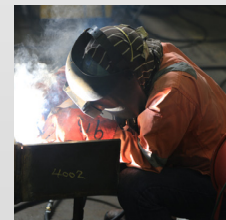

Onshore assets

Westmont provides procurement, fabrication and installation services for onshore assets. We can deliver your most comprehensive and complicated requirements. From detailed design and engineering, generation of isometric drawings and P&ID's, fabrication of piping, structures and specialised equipment, installation, testing to commissioning. We provide expertise in delivering highly complex modules, process piping, structures and specialised equipment. Our advanced supply chain reaches all parts of the globe to be able to provide high quality and exotic materials. From raw material supply, forgings, machined components and OEM parts, we provide an all-encompassing service through a proven and reliable supply chain.

Specialised welding, or simple carbon steel piping, we have access to hundreds of qualified welding processes and procedures to deliver most requirements.

Project management

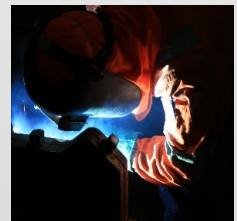

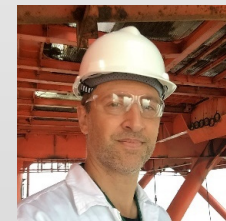

At the heart of everything we do, we bring agility and openness to every business deal we make.

Our people are the cornerstone of our success and reliability.

We provide:

- Project management
- Expertise in both manpower and supervision
- Design support
- Equipment knowledge and expertise

One interface, one leader, one focus.

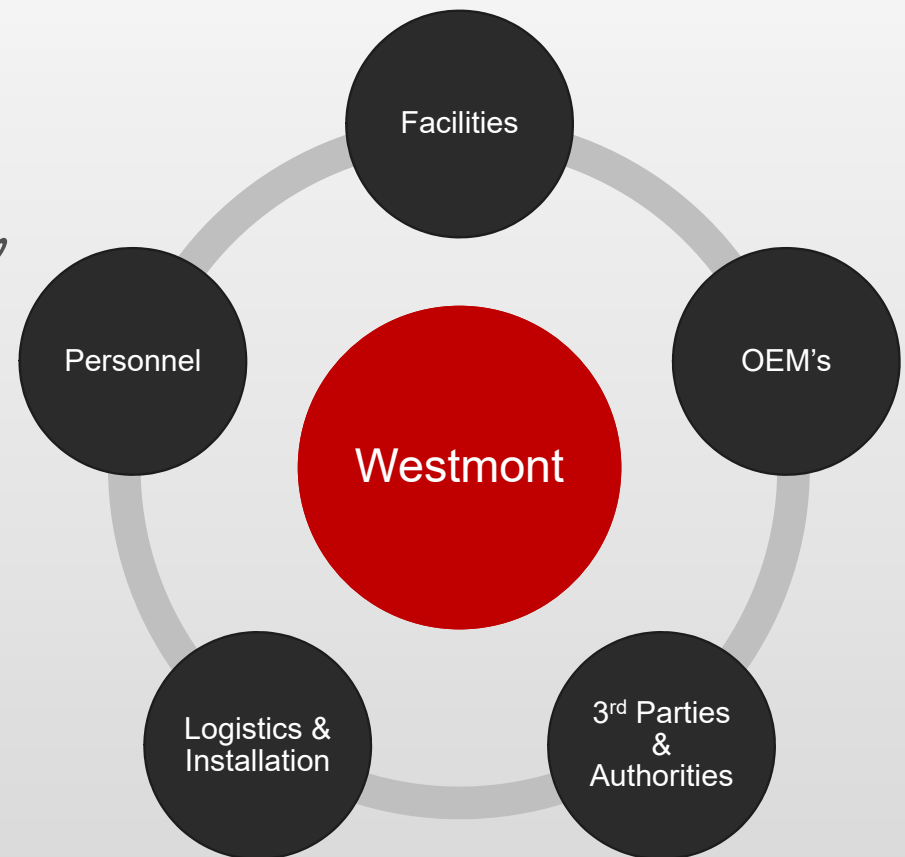

Our purpose

Westmont, your partner from inception to final delivery, we are there with you providing:

Expertise and Adaptability

What we stand for

The Westmont journey has been borne out of the deep rooted desire to do so much better than has been on offer to date, in every respect.

A better way to provide services and support to customers, a better way to be an employer, a better way to behave, a better focus to have and a better way to be a company.

We are not bound by profit pirates nor corporate bureaucracy and when doing things better means doing things differently, we bravely face whatever comes our way.

We truly believe in what we do and we love doing it.

Our vision

We make no secrets as to why we are here. We aspire to:

Serve our customers greatly;

Lead people with integrity and inspiration;

Provide no nonsense competence and expertise; and

*Be **adaptable** to move as required.*

Our mission

To engage the right knowledge, capabilities and processes, along with an accommodating and adaptive solution oriented focus for our customers.

Bringing expertise and adaptability to everything we do.
